

The Ultimate 'D.I.Y.' Bali Thatch Gazebos

What makes our 'D.I.Y.' Bali Thatch Gazebos the Ultimate?

Our superior roof design allows you to attach the Alang Alang thatching on the ground. No more getting up & down a ladder for 2 days thatching your gazebo!! Simply lay the roof frames on a table & thatch away. Or let us thatch it for you with our superior 'Ready To Go' Thatch Gazebo range. Ask your sales person all about it.

The Ultimate 'D.I.Y.' Bali Thatch Gazebos include...

- 120 mm x 120 mm dressed Cypress posts (an advisable option as it has more strength) or 200 mm round treated pine posts from Australian grown plantations.
- Pre cut roof cut to the correct angle to ensure the roof is water proof with non arsenic based Ecowood treated pine fascia, redwood hips & rafters & Western Red Cedar centre pinnacles. This pre fabricated roof allows you to attach the thatching yourself on the ground. A truly ultimate D.I.Y. gazebo that makes setup a breeze.

Our Ultimate 'D.I.Y.' Bali Thatch Gazebos makes setup a breeze...

- 3 metre lengths of Alang Alang thatching woven onto bamboo battens with the correct coverage to ensure the gazebo is water proof.
- 2.4 metre long Alang Alang hips to ensure coverage on all sides of the gazebo.
- All hardware including: screws, wire, ridge capping & bolt down brackets for freestanding models supplied with step by step, diagrammed setup instructions for ease of installation.

The Superior 'READY TO GO' Bali Thatch Gazebos

What makes our 'Ready To Go' Bali Thatch Gazebos truly superior?

The superior roof design has the Alang Alang thatching already attached. We have taken all the hard work out of the Installation with the 8 framed & thatched roof sections fitting into the gazebo like a glove.

The superior 'Ready To Go' Bali Thatch Gazebos include...

- 120 mm x 120 mm dressed Cypress posts (an advisable option as it has more strength) or 200 mm round treated pine posts from Australian grown plantations.
- Pre fabricated roof frames with Alang Alang thatching already attached cut to the correct angle to ensure the roof is water proof with non arsenic based Ecowood treated pine fascia, redwood hips & rafters plus Western Red Cedar centre pinnacles.
